Skills

HTML5, CSS3, JavaScript
Responsive Web Design
MySQL
GitHub, VS Code
Problem Solving, Time Management

Education

Bachelor of Science in Computer Science
University of Sindh, Pakistan 2021 – 2024

Experience

Web Developer - Spark Lab – Karachi, Pakistan – Onsite Feb 2026 – Present

- Built dynamic and responsive web applications using (Laravel / WordPress).
- Integrated REST APIs and third-party services.
- Implemented database management (MySQL).
- Improved SEO and website performance.

PHP Developer Intern — HIST Jamshoro — Onsite Feb 2025 – May 2025

- Developing Online-Blogging-Application using PHP, MySQL, JavaScript, HTML, and CSS Bootstrap.
- Designed and implemented modules like login/register systems, blog management, chat applications, and email box systems.
- Used AJAX for dynamic interactions such as live search, dependent dropdowns, and real-time chat functionality.
- Built admin dashboards with user role management, activation/deactivation features, and login tracking using file-based logs.
- Applied Bootstrap for responsive and modern UI designs.

WordPress Intern — HIST Jamshoro — Onsite June 2025 – July 2025

- Customized WordPress themes and plugins to meet specific project requirements.
- Developed responsive and SEO-friendly WordPress websites using Elementor and custom widgets.
- Gained hands-on experience with WordPress CMS, theme customization, plugin integration, and basic PHP templating.
- Worked on site optimization, performance tuning, and implemented basic security practices.

Projects

Blog Management System

- Built a complete blogging platform with user registration, login, role-based dashboards (admin, editor), and CRUD operations for posts.
- Implemented pagination, category management, and user feedback features using PHP, MySQL, and Bootstrap.

Crowd Anomaly Detection System (YOLOv8 + OpenCV)

- Built AI-powered surveillance system capable of detecting unusual behaviors in real-time video feeds.
- Reduced false positives by 25% using custom-trained datasets.

Group Chat Application

- Developed a PHP-based group chat system with login, online status tracking, and AJAX-powered real-time messaging.
- Stored chat history in MySQL and ensured smooth multi-user communication.

Achievements

2nd Position – Final Year Project (2025)
2nd Position – Sindh University IT Competition (2024)
